⁸ No authoritative, comprehensive and fully explanatory source appears to exist for the numbers of Eritreans, or Eritrean refugees and asylum seekers, in the world and in various countries. The statistics that follow in Topic B appear to vary in (or often to be unclear about) their inclusion of different things: Eritreans who were born in Eritrea, ethnic Eritreans who were born in the country to which the statistics pertain, Eritreans who fled the country before its independence versus those who fled under the subsequent and current regime, family members and descendants of any of the foregoing, economic migrants in addition to refugees and asylum seekers, refugees who became citizens in their host country, refugees who have not registered as such with the United Nations. In addition, because the figures are drawn from a variety of sources, they likely were assembled by way of varying methodologies; so comparisons from one country to the next might not be fully appropriate. That is, the figures in Topic B are more indicative than absolute. The America Team has been unable to ascertain even an approximate figure for Eritreans living in the U.S. – of any of the above descriptions; but our colleagues in the Eritrean community here believe that the number, liberally inclusive, exceeds 100,000.
